

# Understanding Features of Education: Essential in Progression of Individuals

Radhika Kapur

**Abstract:** *The individuals, belonging to all communities, categories and socio-economic backgrounds have recognized the importance of education on a comprehensive basis. They are getting enrolled in educational institutions of all levels. Within rural communities, these are not in a well-developed state, whereas, within urban communities, these are well-developed, hence, individuals are migrating to urban communities to acquire education. As a consequence of acquiring an efficient understanding of features of education, progression will take place of individuals. Hence, it is of utmost significance for all individuals to acquire the meaning of features of education. These highlight how education is useful to individuals in bringing about improvements in overall personality traits and standards of living. Furthermore, the information that is generated through acquiring good-quality education needs to be put into practice in order to promote well-being of family and community members. Furthermore, living conditions of the individuals will be enhanced. When women, belonging to disadvantaged sections of the society acquire education, they will render an important contribution in bringing about improvements in their overall quality of lives. Therefore, in order to lead to up-gradation of overall standards of living and achieve desired goals and objectives, one needs to acquire an understanding of features of education. The main concepts that are taken into account in this research paper are, features of education, understanding features of education is facilitating in promoting enrichment of living conditions and understanding features of education is essential in promoting women empowerment.*

## I. INTRODUCTION

An aimless life is regarded as the meaningless life. Hence, all individuals, irrespective of their communities, categories and socio-economic backgrounds have different types of goals and objectives to achieve. These are in personal as well as in professional lives. The acquisition of education prepares the individuals in terms of different types of methodologies and procedures, which would be facilitating in achievement of different types of goals and objectives (Chapter – IV, n.d.).

Education is regarded as the instrument, which imparts information in terms of not only academic subjects and lesson plans, but also in terms of ways that are necessary in emerging into moral and ethical human beings and productive citizens of the country. Furthermore, education is facilitating in coping with different types of dilemmas and challenging situations in a satisfactory manner. The individuals are honing different types of skills and abilities, which would be facilitating in generating desired outcomes. Therefore, individuals, belonging to all occupations and communities are contributing efficiently in achieving educational goals. The individuals are required to carry out number of tasks and activities in their personal and professional lives. Some of these are, management of household responsibilities; carrying out banking transactions; promoting good health, physically and psychologically; making investments in various policies and schemes; making purchases and sales of various items; promoting enhancement of overall personality traits and bringing about improvements in one's overall standards of living. The acquisition of education prepares the individuals in terms of certain factors, which would be facilitating in the achievement of different types of educational goals. One of the important aspects that individuals are required to take into account is, individuals are required to differentiate between various types of appropriate and inappropriate aspects (Unit 1, n.d.). Hence, education is regarded as vital in augmenting information in terms of strategies, which are facilitating in putting into operation all types of job duties and responsibilities in a satisfactory manner. Therefore, individuals are required to lead to up-gradation of motivation and concentration levels towards carrying out all types of job duties and responsibilities efficiently.

## II. FEATURES OF EDUCATION

The individuals are different from each other in terms of number of factors, i.e. caste, creed, race, religion, ethnicity, gender, age groups, occupations, educational qualifications, cultures, personality traits, communities and socio-economic backgrounds. One of the common goals of all individuals is to sustain their living conditions in an efficacious manner. When the individuals are wholeheartedly committed towards achievement of this goal, they get enrolled in educational institutions of all levels. The individuals are required to prepare themselves adequately towards the achievement of this goal. The individuals need to ensure, they are well-informed in terms of different types of competencies and abilities.

## Understanding Features of Education: Essential in Progression of Individuals

Education is stated to render an important contribution in generating information in terms of all types of subjects and concepts (How to Improve Student Behaviour in the Classroom, 2020). The individuals are investing financial, technical, material and information resources in order to acquire education, hence, they need to ensure, they make use of their educational qualifications in promote well-being and goodwill of themselves, families and community members. Features of education have been stated as follows:

### A. Development of the Mind-sets

The development of the mind-sets is regarded as vital in order to live productive lives. This is facilitating to the individuals in leading to up-gradation of analytical, critical-thinking and problem-solving skills. Furthermore, individuals will be able to make wise and productive decisions in terms of various factors. In addition, the individuals will lead to up-gradation of motivation and concentration levels towards putting into operation different types of job duties and responsibilities. From the stage of early childhood, throughout the lives of the individuals, they are focusing on development of the mind-sets. The participation of other individuals is regarded as vital in leading to development of the mind-sets of the individuals. These include, family members, relatives, friends, educators, employers, supervisors, classmates, colleagues and other community members. Furthermore, individuals are required to augment different types of competencies and abilities. The up-gradation of listening skills is facilitating in generating desired outcomes. This is facilitating in developing the mind-sets of the individuals. Therefore, development of the mind-sets is regarded as one of the indispensable features of education.

### B. Development of Comprehensive Human Interest

Education is regarded as the instrument, which imparts information in terms of not only academic subjects and lesson plans, but also in terms of ways that are necessary in emerging into moral and ethical human beings and productive citizens of the country. Furthermore, education is facilitating in coping with different types of dilemmas and challenging situations in a satisfactory manner. The individuals are augmenting different types of skills and abilities, which would be facilitating in generating desired outcomes. Within educational institutions of all levels, students are encouraged to participate in different types of extra-curricular and creative activities, i.e. production of different types of artworks, handicrafts, singing, dancing, playing of musical instruments, role playing, physical activities and various types of sports. As a consequence, the mind-sets of the individuals will be stimulated and they will lead to up-gradation of motivation levels towards learning and achievement of educational goals. Furthermore, they will possess the abilities to work under stress. In this manner, individuals will render an important contribution in the development of human interest. Therefore, development of comprehensive human interest is one of the significant features of education.

### C. Development of Leadership Skills

The individuals are required to be well-informed in terms of importance of leadership skills. The leaders are

vested with the authority and responsibility of guiding and leading others in the right direction. The educators assign job duties to individuals, which would be facilitating in leading to up-gradation of leadership skills. The students are assigned the job duties of monitoring and supervision; they are required to help their classmates, who are overwhelmed by setbacks in their studies; management of teaching-learning materials is essential; maintenance of cleanliness is regarded as vital within classroom settings; communication processes are required to take place in a decent manner; the students need to pay adequate attention towards their studies; they need to depict the traits of helpfulness and co-operation; one needs to reinforce the traits of morality and ethics; augment traits of diligence, resourcefulness and conscientiousness and individuals are required to be well-informed in terms of methods, which are facilitating in the achievement of all types of educational goals. Thus, it is well-understood, up-gradation of leadership skills is essential in putting into operation all tasks satisfactorily. Therefore, development of leadership skills is an eminent feature of education.

### D. Promotion of Economic Growth

The acquisition of higher education is optional. After the completion of high school, the individuals may or may not get enrolled in higher educational institutions. When the individuals are pursuing higher education, they are required to make use of their educational qualifications, competencies and abilities in promoting economic growth. The individuals aspire to get engaged in good employment opportunities and sustain their living conditions in an effective manner. For example, when individuals are to apply for management positions within various types of organizations, they are required to possess a degree of Masters in Business Administration. When they are to obtain teaching positions at college or university levels, they are required to obtain masters or doctoral degrees. Hence, it is well-understood, possession of required educational qualifications is considered to be vital in acquisition of employment opportunities and in promoting economic growth. In other words, when individuals are rendering an important contribution in bringing about improvements in financial positions, they are promoting economic growth. As a consequence, they will contribute efficiently in bringing about improvements in one's overall quality of lives. Therefore, promotion of economic growth is an expedient feature of education.

### E. Development of Personality Traits

The individuals are able to contribute efficiently in development of personality traits through acquisition of education. The individuals are able to augment their information in terms of various factors, i.e. possessing an approachable nature and an amiable attitude; depicting the traits of helpfulness and co-operation; inculcation of the traits of morality and ethics; implementation of traits of diligence, resourcefulness and conscientiousness;

augmenting different types of skills and abilities; promoting good health and well-being, physically and psychologically; coping with psychological problems of anger, stress, anxiety, frustration and depression in a satisfactory manner; treating health problems and illnesses in a satisfactory manner; managing body weight and reinforcing a constructive approach. The educators have introduced the subject of health education in all classroom settings. The promotion of good health, both from physical as well as psychological perspectives is regarded as vital in leading to up-gradation of overall personality traits. The individuals are required to ensure, they generate information and put into operation different types of methods and procedures in a satisfactory manner. As a consequence, enhancement will take place of overall personality traits. Therefore, development of personality traits is a noteworthy feature of education.

### III. IMPLEMENTATION OF SCIENCE-BASED TECHNOLOGY

In the present existence, with advancements taking place, the utilization of technologies has acquired prominence. The educators and students in educational institutions of all levels are making use of technologies and internet in the implementation of different types of tasks and activities. The internet is regarded as one of the prominent sources that is utilized on a comprehensive basis. It is made use of to augment information regarding different types of subjects and concepts, obtain answers to all types of questions and clarify their doubts in terms of different factors. The educators also make use of various types of technologies in order to prepare adequately for their lectures. The science-based technology is utilized by the educators and students in order to acquire an efficient understanding of academic subjects and concepts. The technologies are made use of to prepare assignments, reports, projects, spread-sheets and so forth. This is facilitating in doing well in one's job duties and achievement of desired goals. Hence, implementation of science-based technology is not only promoting student learning, but it is leading to up-gradation of overall system of education. Therefore, implementation of science-based technology is a notable feature of education.

#### A. Instrument of Social Change

Education is regarded as an instrument of social change. Changes are regarded as an integral part of the lives of the individuals. These take place in personal and professional lives. Through acquisition of education, individuals are preparing themselves adequately in bringing about changes. The individuals are not only generating information in terms of academic subjects and lesson plans, but also in terms of ways that are necessary in emerging into moral and ethical human beings and productive citizens of the country. Furthermore, education is facilitating in coping with different types of dilemmas and challenging situations in a satisfactory manner. The individuals are augmenting different types of skills and abilities, which would be facilitating in generating desired outcomes. As a consequence, individuals are contributing efficiently in bringing about changes. The individuals need to make sure,

changes are positive. In other words, these need to be facilitating in doing well in one's jobs and achieving desired goals. One of the important aspects that needs to be taken into account is, changes need to be facilitating in promoting well-being of oneself, family and community members. Therefore, instrument of social change is a meaningful feature of education.

#### B. Promoting Health and Well-being

The individuals, from the stage of early childhood, throughout their lives are required to promote good health and well-being, physically as well as psychologically. Through acquisition of education, individuals are augmenting information in terms of different types of factors, which are facilitating in promoting health and well-being from the physical and psychological perspectives. These are, focusing on diet and nutrition; getting engaged in exercises and physical activities; practicing the techniques of yoga and meditation; coping with different types of psychological problems in an effective manner; forming an effective social circle; treating different types of health problems and illnesses; alleviating loneliness; being well-informed in terms of all types of job duties and responsibilities; being well-equipped in terms of methodologies and procedures; inculcating the traits of morality and ethics; implementing the traits of diligence, resourcefulness and conscientiousness; augmenting different types of skills and abilities and preparing oneself to overcome setbacks. As a consequence of reinforcing all these factors, good health and well-being will be promoted, physically as well as psychologically. Hence, individuals need to reinforce all these factors in an efficient manner. Therefore, promoting health and well-being is a worthwhile feature of education.

#### C. Promoting Gender Equality

The individuals, belonging to rural communities give preference to male children. They form the viewpoint that they are assets and contribute efficiently in promoting well-being and goodwill of their families. On the other hand, girls are regarded as liabilities. The individuals feel they will make demands and will not yield any returns on investment. Hence, from the stage of early childhood, they are trained in terms of implementation of all types of household responsibilities. The main reason being, they are required to eventually get married and go to marital homes. The male children are encouraged to acquire education. Through acquisition of education, individuals are augmenting information in terms of the factor that girls can also render an important contribution in promoting well-being and goodwill of their families and communities, provided they are given opportunities to do so. Hence, they are encouraged to get enrolled in educational institutions, acquire education, augment competencies and abilities and get engaged in employment opportunities. As a consequence, the girls will be provided with equal treatment as compared to their male counterparts and gender equality will be promoted. Therefore, promoting gender equality is a vital feature of education.

### D. Leading to Women Empowerment

Through acquisition of education, individuals are augmenting information in terms of the factor that girls can also render an important contribution in promoting well-being and goodwill of their families and communities, provided they are given opportunities to do so. Within classroom settings, educators impart information among individuals that both men and women are equal in terms of their competencies, abilities and aptitude. Hence, they are required to be provided with equal rights and opportunities as compared to their male counterparts. Furthermore, there should not be any discrimination on the basis of any factors. Hence, they are encouraged towards acquisition of empowerment opportunities. The girls are encouraged to get enrolled in educational institutions, acquire education, augment competencies and abilities and get engaged in employment opportunities. As a consequence, the girls will render an important contribution in acquiring empowerment opportunities. In this manner, they will prepare themselves in coping with different strategies and women empowerment will be promoted in a satisfactory manner. As a consequence, girls will render an important contribution in promoting well-being and goodwill of family and community members. Therefore, leading to women empowerment is a crucial feature of education.

### E. Inculcation of Traits of Morality and Ethics

From the stage of early childhood, throughout the lives of the individuals, they are required to be well-informed in terms of traits of morality and ethics. It is apparently understood that individuals aspire to carry out all types of tasks and activities in a successful manner, hence, they need to ensure, they carry out different types of job duties in a moral and ethical manner. The individuals learn to inculcate the traits of morality and ethics, when they are acquiring education. Within educational institutions of all levels, individuals will have to inculcate the traits of morality and ethics. These are facilitating in augmenting information regarding different factors, doing well in one's studies and achieving different types of educational goals. Furthermore, individuals will contribute efficiently in meeting the expectations of educators. One of the important aspects is, individuals are required to carry out their job duties in an honest and efficient manner. Within personal lives as well, within the course of putting into operation various job duties and dealing and working with others, these traits are facilitating in doing well in one's job duties and generating desired outcomes. Therefore, inculcation of traits of morality and ethics is a fundamental feature of education.

### F. Implementation of Traits of Diligence, Resourcefulness and Conscientiousness

Throughout the lives of individuals, they are required to be well-informed in terms of traits of diligence, resourcefulness and conscientiousness. It is apparently understood that individuals aspire to carry out all types of tasks and activities in a successful manner, hence, they need to overcome setbacks as well. The implementation of traits of diligence, resourcefulness and conscientiousness are the key in putting into operation various tasks in a well-ordered and satisfactory manner. Within educational institutions of all levels, individuals augment information regarding

significance of these traits. These are facilitating in doing well in one's studies, coping with different types of dilemmas in a satisfactory manner and achieving different types of educational goals. Furthermore, individuals will contribute efficiently in meeting the expectations of educators. One of the important aspects is, individuals are required to carry out their job duties in a well-ordered, honest and efficient manner. Within personal lives as well, within the course of putting into operation various types of job duties and dealing and working with others, these traits are facilitating in doing well in one's job duties and achieving desired goals. Therefore, implementation of traits of diligence, resourcefulness and conscientiousness is a key feature of education.

## IV. AUGMENTING SKILLS AND ABILITIES

The individuals, belonging to all communities, categories and socio-economic backgrounds are required to augment different types of skills and abilities. Within the course of acquisition of education, the individuals are putting emphasis on augmenting different types of skills and abilities. The various types of skills are, communication skills, decision-making skills, analytical skills, critical-thinking skills, problem-solving skills, technical skills, creative skills, artistic skills, intellectual skills, public-speaking skills, time-management skills, negotiation skills, leadership skills, personal skills, professional skills and presentation skills. On the other hand, abilities, which need to be honed are, convincing, persuasion, management, administration, directing, leading, organizing, emotional intelligence, systems thinking, possessing the abilities to work under stress, putting in efforts to one's best abilities, coping with various types of dilemmas in an adequate manner and carrying out all types of tasks and activities in a well-ordered and disciplined manner. These are put into operation by the individuals within as well as outside the homes. One of the important aspects that needs to be taken into account is, skills and abilities are required to be implemented in a satisfactory and positive manner. Therefore, augmenting skills and abilities is a useful feature of education.

### A. Promoting Enrichment of Career Prospects

Through acquisition of education, individuals are contributing efficiently in leading to up-gradation of career prospects. The individuals are rendering an important contribution in leading to up-gradation of competencies, abilities and aptitude. They are generating information in terms of different types of methodologies and procedures, which are facilitating in putting into operation various types of tasks and activities in a well-ordered and regimented manner. As a consequence, individuals will contribute efficiently in coping with different types of dilemmas and challenging situations in a well-ordered and regimented manner. The individuals are required to be well-informed in terms of all types of methods and approaches, which would be facilitating in leading to up-gradation of their career prospects.

One of the important aspects that needs to be taken into account is, individuals are required to be well-versed in terms of their job duties, responsibilities and methodologies, which would be facilitating in promoting enrichment of their career prospects. One of the important aspects that needs to be taken into account is, individuals are required to focus on developing mutual understanding with others. Therefore, promoting enrichment of career prospects is a favourable feature of education.

### B. Leading to Up-gradation of Standards of Living

Leading to up-gradation of standards of living is regarded as one of the primary goals of individuals, irrespective of their communities, categories and socio-economic backgrounds. In order to achieve this goal, they are required to be well-equipped in terms of various factors, i.e. promoting a normal mind-set; honing analytical, critical-thinking and problem-solving skills; coping with different types of psychological problems in an effective manner; forming an effective social circle; treating different types of health problems and illnesses; alleviating loneliness; being well-informed in terms of all types of job duties and responsibilities; being well-equipped in terms of methodologies and procedures; inculcating the traits of morality and ethics; implementing the traits of diligence, resourcefulness and conscientiousness; augmenting different types of skills and abilities and preparing oneself to overcome setbacks. As a consequence of reinforcing all these factors, one will contribute efficiently in promoting enrichment of overall standards of living. Within the course of pursuance of educational goals, one will contribute efficiently in generating information regarding all these factors. Hence, individuals need to ensure, they put these into operation in an effective manner. Therefore, leading to up-gradation of standards of living is an advantageous feature of education.

### C. Understanding Features of Education is Facilitating in Promoting Enrichment of Living Conditions

From the stage of early childhood, throughout the lives of the individuals, they are required to be well-informed in terms of traits of generosity, kind-heartedness and integrities. It is apparently understood that individuals aspire to carry out all types of job duties and responsibilities in a successful manner, hence, they need to ensure, they carry out different types of job duties in a moral and ethical manner. The individuals acknowledge the meaning and significance of traits of generosity, kind-heartedness and integrities, when they are acquiring education. Within educational institutions of all levels, individuals will have to inculcate these traits in order to generate desired outcomes (Importance of Honesty, 2017). These are facilitating in augmenting information regarding different factors, doing well in one's studies and achieving different types of educational goals. Furthermore, individuals will contribute efficiently in meeting the expectations of educators. One of the important aspects is, individuals are required to carry out their job duties in an honest and efficient manner. Therefore, individuals understand that features of education is facilitating in promoting enrichment of living conditions.

Acquisition of education facilitates in generating information regarding various factors, i.e. making wise and productive decisions; promoting a normal mind-set; honing analytical, critical-thinking and problem-solving skills; coping with different types of psychological problems in an effective manner; forming an effective social circle; treating different types of health problems and illnesses; alleviating loneliness; being well-informed in terms of all types of job duties and responsibilities; being well-equipped in terms of methodologies and procedures; inculcating the traits of morality and ethics; implementing the traits of diligence, resourcefulness and conscientiousness; augmenting different types of skills and abilities and preparing oneself to overcome setbacks. As a consequence of reinforcing all these factors, one will contribute efficiently in achievement of desired goals and promoting enrichment of overall standards of living. Therefore, one understands that features of education is facilitating in promoting enrichment of living conditions, when individuals are augmenting information in terms of all the essential factors.

The individuals, belonging to all communities, categories and socio-economic backgrounds make selection of the fields in accordance to their competencies, abilities and aptitude. Through acquisition of education, individuals are contributing efficiently in leading to up-gradation of living conditions. The individuals are rendering an important contribution in leading to up-gradation of competencies, abilities and aptitude. They are generating information in terms of different types of methodologies and procedures, which are facilitating in putting into operation various types of job duties and responsibilities in a well-ordered and regimented manner (How to Develop Competencies, n.d.). As a consequence, individuals will contribute efficiently in coping with different types of dilemmas and challenging situations in a satisfactory manner. Furthermore, these will be prevented from assuming a major form and giving rise to impediments within the course of implementation of job duties. The individuals are required to be well-informed in terms of all types of methods and approaches, which would be facilitating in leading to up-gradation of their living conditions. Therefore, one understand that features of education is facilitating in promoting enrichment of living conditions, when up-gradation takes place of overall living conditions.

### D. Understanding Features of Education is Essential in Promoting Women Empowerment

The individuals, belonging to rural communities give preference to male children. They form the viewpoint that they are assets and contribute efficiently in promoting well-being and goodwill of their families. On the other hand, girls are regarded as liabilities. The individuals feel they will make demands and will not yield any returns on investment. Hence, from the stage of early childhood, they are trained in terms of implementation of all types of household responsibilities.

## Understanding Features of Education: Essential in Progression of Individuals

The main reason being, they are required to eventually get married and go to marital homes. The male children are encouraged to acquire education and get engaged in different types of employment opportunities. Through acquisition of education, individuals are augmenting information in terms of the factor that girls can also render an important contribution in promoting well-being and goodwill of their families and communities, provided they are given opportunities to do so. Hence, they are encouraged to get enrolled in educational institutions and get engaged in employment opportunities. As a consequence, girls will be given equal treatment as compared to their male counterparts and gender equality will be promoted. Therefore, it is well-understood, features of education are essential in promoting women empowerment.

Through acquisition of education, individuals are augmenting information in terms of the factor that girls can also render an important contribution in promoting well-being and goodwill of their families and communities, provided they are given opportunities to do so. Within classroom settings, educators impart information among individuals that both men and women are equal in terms of their competencies, abilities and aptitude. Hence, they are required to be provided with equal rights and opportunities as compared to their male counterparts. Furthermore, there should not be any discrimination on the basis of any factors. Hence, they are encouraged towards acquisition of empowerment opportunities. The girls are encouraged to get enrolled in educational institutions, acquire education, augment skills and abilities and get engaged in employment opportunities. As a consequence, the girls will render an important contribution in acquiring empowerment opportunities. In this manner, they will prepare themselves in coping with different methodologies and women empowerment will be promoted in a satisfactory manner. As a consequence, girls will render an important contribution in promoting well-being and goodwill of family and community members. Therefore, it can be stated, features of education are essential in promoting women empowerment. The women are enhancing their career prospects in different fields, i.e. education, architecture, literature, journalism, law, science, technology, medical, health care, and so forth. In all fields, the individuals are required to be well-informed in terms of different types of job duties and responsibilities. In addition, information is to be augmented in terms of different types of methodologies and procedures. Furthermore, through acquisition of education, individuals are contributing efficiently in leading to up-gradation of living conditions. In addition, the individuals are rendering an important contribution in leading to up-gradation of competencies, abilities and aptitude. They are generating information in terms of different types of methodologies and procedures, which are facilitating in putting into operation various types of job duties and responsibilities in an efficient and disciplined manner. As a consequence, individuals will contribute efficiently in coping with different types of dilemmas and challenging situations in a satisfactory manner. Therefore, it is understood on a comprehensive basis that features of education are essential in promoting women empowerment.

## V. CONCLUSION

Education is the instrument, which imparts information regarding academic subjects and ways of emerging into moral and ethical human beings and productive citizens of the country. Features of education are, development of the mind-sets, development of comprehensive human interest, development of leadership skills, promotion of economic growth, development of personality traits, implementation of science-based technology, instrument of social change, promoting health and well-being, promoting gender equality, leading to women empowerment, inculcation of traits of morality and ethics, implementation of traits of diligence, resourcefulness and conscientiousness, augmenting skills and abilities, promoting enrichment of career prospects and leading to up-gradation of standards of living. Understanding features of education is facilitating in promoting enrichment of living conditions. Understanding features of education is essential in promoting women empowerment. Finally, it can be stated, acquisition of education leads to progression of individuals, communities and nation as a whole.
